**Objet :** Green Cross Biopharma Corp. | Urokinase | PV reporting Algeria | Patient: ABC DE

Dear Partner,

Please find in the following the information relating to the pharmacovigilance case received today 23-January-2024:

*Dr REDJAOUA* ██████████, assistant pediatrician at CHU Béjaia (pediatric service) informed us (today 23-January-2024) that :

- The patient: ABC DE, male
- Born : on 09-february-2018
- Disease: MPS
- Treatment : under enzyme therapy since 21-November-2022 "Urokinase" (quantity 2 vials/weights 24 Kg)

Had on yesterday, 22-January-2024 an allergic reaction (generalized urticaria) after 30 min of infusion:

- The flow rate was 16cc/h,
- The patient received premedication : Hydrocortisone IV 5mg/kg and Antihistaminic prior to treatment,

- The pediatrician decided to continue the infusion and reduced the flow to 8cc/h but the urticaria persisted thereafter she stopped the infusion which lasted in total about 1 hour,
- The urticaria disappeared after half an hour and following IV administration of Hydrocortisone 5mg/kg and Antihistaminic oral,
- The pediatrician prescribed an antihistaminic for the patient and kept him under observation for a few hours,
- Last infusion received before yesterday's is dated on Monday, 08-January-2024 :
  - It should be noted that the patient had a reaction on this date; a redness in the forearms after finishing his infusion and which disappeared 15 minutes later,
  - Between the two reactions the patient missed an infusion due to fever, angina and bronchitis, he was for 8 days on antibiotic therapy (Amoxicillin and Cefixime) which was last taken on 20-January-2024.

It should be also noted that there is a second MPS patient being treated in the same service and whom receives his treatment on the same infusion days and with the same batch of Urokinase ; this patient had no reaction.

- Batch No. : 2024041616
  - Mfg. Date : 29.11.2022
  - Exp. Date : 28.11.2024

While waiting to receive the CIOMS format relating to this case, we remain available for any further information.

Receive our best regards,

---
